Dear Hiring Manager,

If you want a flexible, compassionate and result-driven teacher then please continue reading. I am highly interested in becoming a teacher in the Incheon area. I am an Irish university graduate with a Bachelor of Music Degree from University College Dublin, a TESOL certification and I have been teaching elementary and middle-school students for the past two years.

At my current position, I have had the opportunity to work with numerous gifted students. I have even worked with some of them on an individual basis to prepare them for speech competitions and other presentations.

I love working with all kinds of learners and helping them expand their knowledge through parliamentary debate and TOEFL classes. Likewise, I find it rewarding to be able to transform struggling students. In addition, teaching has helped me to think more critically about language learning and teaching methods. I think a teacher's responsibility is to constantly aid students to perform better by cutting out unnecessary steps, increasing enjoyment and teaching independent and critical thinking to each student so that they may use every moment to its potential.

I am used to working in fast-paced environments and I have always earned a reputation for problem solving, being knowledgeable and able to grasp new concepts easily. Over the course of my sales and marketing career, I have also had the opportunity to give presentations at seminars and for existing or potential customers.

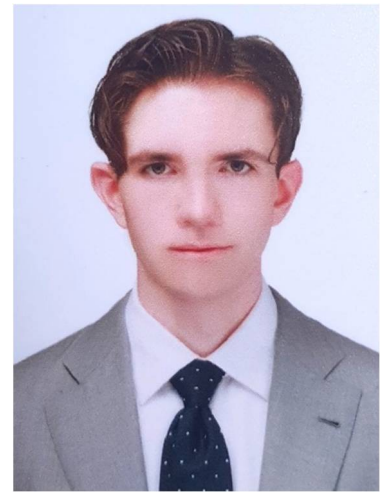

I have a good attitude and unwavering determination which I am sure would be a positive addition to Spark English. I appreciate your time and consideration. I will look forward to hearing from you.

Sincerely,

Charles Barnes
